THE FACTS BEHIND THE CLAIM

ABLE TO RUN DRY

The ability to run dry is one of Hydra-Cell's greatest assets and stems from the fact that a Hydra-Cell pump does not depend on the pumped fluid for seal lubrication... WHY??? Because there are no dynamic seals in a Hydra-Cell pump that come into contact with the pumped liquid!

Run a pump dry that has dynamic seals and what do you get? Seal wear, overheating and eventual, expensive, catastrophic damage. Do the same to a Hydra-Cell pump and it goes on and on and on... indefinitely.

For protection against operator error, and peace of mind when completely emptying containers such as IBCs, Hydra-Cell is the safe solution.

HYDRA-CELL[®] ... MADE TO METER
