The latest in Solid Pumping & Mixing
Technology from Monitor Pumps & Systems

THE ORIGINAL CHOPPER PUMP

 Vaughan

Non-Clog Guarantee

With around 25,000 units in service worldwide, unparalleled product reliability has allowed Vaughan to GUARANTEE every pump sold.

Offering more than just another materials and workmanship warranty, the Vaughan Guarantee is assurance to the end user of reliable, clog-free solids handling performance.

Vaughan Chopper Pumps should not be confused with other types or brands of cutter pump, grinder pumps, macerator pumps, chopper pumps or "non-clog" trash pumps on the market

One of the most common applications where installing a Vaughan Chopper Pump will provide instant payback is in local authority pump stations, Where heavy loadings of solids cause continual clogging problems for existing submersible pumps. Ongoing maintenance of these troublesome sites can be labour intensive and time consuming, costing both councils and rate payers a great deal of money.

With over 50 years of chopper pump experience, Vaughan has established itself as the reliable alternative to conventional pumping for the most challenging, severe duty solids handling applications. For more info, contact Monitor Engineering Pty Ltd.
